## PROFESSIONAL SUMMARY

.NET Developer with **3.5+ years of experience** in designing, developing and maintaining web applications using **C#, ASP.NET MVC, .NET Core, and SQL Server**. Strong experience in REST APIs, database optimization, and full stack development, Passionate about writing clean, efficient code and delivering scalable software solutions.

## TECHNICAL SKILLS

- **Languages:** C++, C#, SQL, Javascript
- **Frameworks:** ASP.NET MVC, .NET Core, Web API
- **Frontend:** HTML, CSS, Bootstrap
- **Database:** SQL Server
- **Tools:** Visual Studio, Git, SSMS
- **Concepts:** DSA, REST APIs, MVC Architecture, Stored Procedures, Functions

## PROFESSIONAL EXPERIENCE

### Junior Software Engineer

#### Seap Infotech (Business Partner of Aktivov, USA)

May 2022 – Present

- Designed, developed, and maintained **web applications** using ASP.Net MVC and .NET Core
- Built and consumed **RESTful APIs** for seamless system integration
- Developed and optimized **SQL server stored Procedures**, improving query performance
- Worked on both frontend and backend to deliver scalable and reliable solutions
- Participated in **requirement gathering, system design, and implementation**
- Fixed production issues and enhanced **application stability**.

## PROJECTS

### Polyclinic Management System (MCA Final Semester)

Technologies: C#, .NET Core, ADO.NET, SQL, JavaScript, JQuery, HTML, CSS, Bootstrap

- Designed and developed this system to manage doctors, patients, appointments, and medicine
- Used ADO.NET for secure and efficient data operations
- Designed and optimized **SQL queries** and **stored procedure** for faster data retrieval
- Created responsive user interface using HTML, CSS, and Bootstrap
- Ensured proper data flow between frontend and backend following MVC architecture.

### Online Shopping Management System (BCA Final Semester)

Technologies: PHP, SQL, HTML, CSS

- Developed end-to-end shopping system including product management and user workflows
- Designed **DFD, ERD, Use Case, and Class Diagrams**
- Implemented core business logic and database structure

### Student Management Mobile Application (In Progress)

Technologies: C#, .NET MAUI, SQLite

- Currently developing a Mobile application using **.NET MAUI** for managing students and there fees
  - Implementing student registration and there monthly fees tracker.
  - Implementing local data storage using **SQLite** for offline access
- 

## EDUCATION

**MCA** – Master of Computer Applications

Indira Gandhi National Open University (IGNOU)

**BCA** – Bachelor of Computer Applications

Indira Gandhi National Open University (IGNOU)
